

A NEW MUSICAL SENSATION FOR LONDON.

According to Parisian and Belgian Critics, THE CHOIR IS A WONDER. There is no Musical Accompaniment, but the Singers are an Orchestra in themselves, producing vocal effects which sent the Musical Critic of the "Figaro" into a paroxysm of delight. They imitate Violins, Trumpets and various instruments.

The Ukrainian National Choir was a revelation for us
It resembles a gigantic organ. It made us really very
enthusiastic.

Belgian Press :

This is perhaps the unique occasion on which I was
able to listen to a choir performance for two hours without
experiencing the slightest fatigue.

M.K.

We no longer see ordinary singers obeying their
Conductor; these are priests and priestesses of a deep
religion. There were also—I have seen it in many eyes
—real tears, tears of emotion and of joy.
